

Overview

Clare Capital Tech Insights 96 - Tech IPO Metrics - 20180907

This week's Tech Insights report looks at the metrics of 180 technology Initial Public Offers (IPO) - when a company goes public. The first chart looks at the valuation of each company at IPO, followed by how much capital was raised at IPO - this will be different to how much total capital was raised by the company over its lifetime. The third chart looks at the valuation to capital raised multiple - valuation divided by capital raised at IPO.

This analysis only includes companies that have raised capital at IPO. Some companies only complete a compliance listing when they go public and don't raise any capital at all. Others complete a reverse listing into a shell/holding company either not raising any capital or making it harder to grab the correct data. All data has been taken from Crunchbase.
